## Best Practices (2020-21)

### Best Practice - I

**1. Title :**

**Contribution in Global Pandemic Covid-19**

**2. Objectives :**

1. To raise awareness about covid-19 pandemic and measures need to be taken for it.
2. To inculcate values of social and moral responsibility among students.
3. To support the needy people in the weaker sections of human community like senior citizen, old age people, divyangjan, poor women etc.
4. To make masks and its free distribution to the society.
5. To develop craftsmanship skill in the students.
7. To help old age people and divyangjan by giving psychological support and assistant in this difficult time.

**3. The Context:**

As the part of social responsibility to the human community, the teachers and office staff members of this institution have made various types contribution to help the needy people. In the year 2020-21, Support, help and contribution were needed by the people from marginalized society. So Institute has initiated this practice.

#### **4. The Practice :**

To promote the use of mask and sanitizer for protection from covid-19, the college organized special programmes for the peoples in the society. The NSS volunteers made door to door visit for providing Arsenic medicine to buildup the immunity of the people. The college distributed the medicine, masks and sanitizer to the people. The college also supplied foods and fruits to the people with the help of NSS volunteers.

The volunteers directly entered into the society for maintaining social distancing during covid-19 pandemic. They mark security boxes for maintaining social distancing in the market.

The student also conducted a project survey by going home to home for collecting the medical information of other family members under the title of "My Family, My Responsibility" it helps to identify the corona patients and make them proper quarantine to stop the spreading of corona virus.

#### **5. Evidence of success :**

Many poor and needy people were benefited to cope up with difficult situation which created by the Covid-19 pandemic. They got psychological support and help. They were given education about this pandemic and its preventive measures. These activities have helped them in abolishing stereotypes about themselves. They could get little bit of financial help in the difficult time.

#### **6. Problems Encountered and Resources Required**

Many restrictions were imposed by the government hence there were many limitations in conduction programs. Many students couldn't join us as traveling facilities were limited. Due to Covid-19 pandemic, students couldn't participate in these social activities in large numbers.

Poor and needy people, old aged people, corona warriors, students' volunteers, medical practitioners, blood donors, blood donation kits, ration, masks, sanitizers, fruits etc are the resources needed to carry out this practice.

## Best Practices (2020-21)

### Best Practice - II

**1. Title :**

**Go Green : An Eco-Friendly Programme**

**2. Objectives :**

1. To make environmental awareness among the students.
2. To conduct environment awareness campaign and motivational programme.
3. To organize rallies street plays for the awareness.
4. To promote the protection and conservation of the environment.
5. To promote the use of natural resources.
7. To prevent the use of plastic.
8. To make a proper management of waste products.
9. To introduce paperless work.
10. To make the Green, Environment and Energy audit of the institution.

**3. The Context:**

Global warming makes a hazardous effects on human life. Day to day man has to face scarcity of water, oxygen and good atmosphere. If there is no an awareness of ecology, human life will be in danger. Without healthy atmosphere one cannot live a healthy life. Human is directly and indirectly responsible for the downfall of ecology. From exploitation of nature to the pollution created environment is in hazardous condition. To grow with green has become a need of the day. Educating people about eco-friendly practices should be the priority. The strategies

need to be incorporated into the institutional planning with the aim of developing a green and green environment along with the campus.

#### **4. The Practice :**

To increase the ground water level it is necessary to save rain water by water harvesting system. Keeping this objective the rainwater harvesting unit has been setup in the campus. The rainfall in terrace is redirected towards borewell to increase its water level.

To save the electricity LED's and CFL have been installed in the college. To shut fans and lights when not needed is our regular practice and such type of slogans are displayed in the college building.

The use of plastic is strictly prohibited in the campus. The students are instructed not to use plastics outside the campus also. To neutralize the carbon in the air more tree plantation is made in the campus. It is known that more oxygen is generated by the Tulsi plants, therefore the bed of Tulsi plant is prepared.

In order to protect the environment the college is practicing paperless work. All departments including administrative block are computer based and the data is maintained on computers.

In order to calculate the natural resources available in the institution the college help to make green, environmental and energy audit to the private consultancy.

#### **5. Evidence of success :**

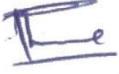

- Due to the implementation of rainwater harvesting unit, the level of ground water increased.
- The use of LED's has also led to the saving of electricity bill and the electric consumption has been reduced.
- The prohibition of plastic use helps to make the campus clean and it helps to balance the eco-system.
- Plantation of more and more trees, tulsi plants make the atmosphere healthy.
- Maintaining the data on computer leads to reduce paper work which helps to protect the trees from cutting.
- The Green, Environment and Energy audit helps to conserve the natural resources available in the campus.

## 6. Problems Encountered and Resources Required

People are still not ready to leave the use of plastic. Because of LED's are more costly than bulbs, it is difficult to make awareness of use of LED's. To manage financial support in establishing rainwater harvesting unit becomes difficult. It is difficult to turn the mindset of the peoples towards Go-Green.
